this text provides a comprehensive examination of classical sociological theory by introducing students to the life times and ideas of the figures who have had the greatest influence on the development of the field each chapter focuses on one theorist and his ideas organized into a social and historical perspective students will enjoy reading the background information on each theorist covered in the book these include such interesting highlights as comte s days in military school the death of durkheim s son in world war i

spencer s inability to commit to marriage and hegel s illegitimate son taking a critical and reflexive approach the text also discusses how classical theory affects sociology today

do economics and statistics succeed in explaining human social behaviour to answer this question leland gerson neuberg studies some pioneering controlled social experiments starting in the late 1960s economists and statisticians sought to improve social policy formation with random assignment experiments such as those that provided income guarantees in the form of a negative income tax this book explores anomalies in the conceptual basis of such experiments and in the foundations of statistics and economics more generally scientific inquiry always faces certain philosophical problems controlled experiments of human social behaviour however cannot avoid some methodological difficulties not evident in physical science experiments drawing upon several examples the author argues that methodological anomalies prevent microeconomics and statistics from explaining human social behaviour as coherently as the physical sciences explain nature he concludes that controlled social experiments are a frequently overrated tool for social policy improvement
